

Application Form – Alexander D. Brickler, MD Fellowship in Obstetrics at the TMH FMRP (Nonsurgical)

Name: _____

Date of Birth: _____

Family medicine doctors are exposed to a wide range of clinical experiences in residency. Those that are driven to seek additional training in obstetrics have usually devoted elective and other extra time towards enriching the typical residency experience.

Describe, **in narrative form**, the following.

1. **Your outpatient OB experience.** Describe in general terms the common issues that you encountered in your OB patient panel. Highlight complex cases and the role that you played in their management. How many continuity patients did you follow throughout their prenatal care and delivery? If still in training, outline what you will expect to have done by the end of training.

2. **Your academic and community experience.** Did you participate in obstetrics/maternal health research? Did you give lectures or other presentations related to this? Did you participate in committees or volunteer work? Did you participate in any maternal health community advocacy?

3. **Your inpatient OB experience.** Describe the team of providers while on inpatient OB and your specific responsibilities on that team (e.g., triage, cervical checks, placement of monitors, postpartum care, etc.). Include numbers of vaginal deliveries, vacuum-assisted deliveries, and other procedural highlights (perineal laceration repairs, D&Cs, tubals, c-sections as assistant, etc.)

4. What do you hope to gain from a 12-month nonsurgical obstetric fellowship, and how will it help you achieve your future career goals?
