

Don't Forget: Add Your Baby to Your Insurance

Congratulations on the new addition to your family! Did you know that you will need to notify your health insurance company that your little one has arrived?

As you settle in with your baby, please be aware that some health insurance companies require newborns to be added within 30 days of their birth. To ensure you receive the appropriate financial support, please confirm that your baby is on your health insurance plan. Failure to submit proper documentation will result in you being financially responsible for all medical expenses.

Once you have received your baby's social security number, be sure to contact your health insurance provider or your employer's human resources department to add your baby to your insurance policy.

If you have any questions, please contact our OB Admissions team at 850-431-0220.

Thank you,
